

# MILIND KHAMKAR

Full Stack Software Engineer with 2.5 years of experience. Skilled and interested in developing and deploying scalable solutions in ASP.NET & .NET Core frameworks.

## WORK EXPERIENCE

**Software Engineer** | 3i Infotech Ltd., Vashi  
April 2026 – present

- Performed technology transfer from legacy WinForms into modern .Net Core Web API applications in a modernization effort for better user experience.
- Accelerating the modernization of legacy enterprise systems by refactoring inline database query execution into stored procedures.
- Collaborating with client-side Business Analysts to perform system analysis and implement feature enhancements using the modern .NET ecosystem.
- Implemented the cloud technology by developing and deploying the .Net Web API and Angular applications over AWS secured cloud infrastructure with dev, UAT and prod rigorous testing phases handled by Terraform as IaC.

**Software Developer** | WinSoft Technologies, Mulund  
Nov 2024 – Dec 2025

- Worked in BFSI back-office modules by optimizing legacy C# code and Stored Procedures to meet strict business requirements and modular standards.
- Managed patch deployments and bug-fix sprints in collaboration with Business and QA and Deployment teams to ensure smoother patch deployments.
- Resolved the App-Sec validation points post UAT acceptance to maintain the system wide data integrity.

**Software Developer** | Geeta Infotech, CBD Belapur  
Sept 2023 – Nov 2024

- Worked in ASP.NET projects for government departmental welfare schemes and inventory management applications.
- Enhanced database logic for better performance and acted as a technical liaison for client requirement gathering and feature updates.

## RELEVANT PROJECTS

**Kotak Trinity** | Kotak Mahindra Bank Ltd.

- Performed technology migration from legacy back-office WinForms executables to .Net Web API applications.
- Developed and maintain the API endpoints and stored procedures for better optimization in accordance with Angular frontend.
- Developed the cloud architecture using Terraform and deployed the .Net Web API and Angular applications to AWS cloud services to maintain the high availability in a multi-tier secured cloud infrastructure.

**AHFL CKYC** | Aadhar Housing Finance Ltd.

- Performed code optimization for the WinForms executables and technical as well as Database support for existing legacy modules.
- Developed and enhanced the modular patches aligned with the client requirements for integration of external API endpoint services.
- Performed the migration of legacy in-line query execution to stored procedures executions for enhanced security, data integrity and quicker re-deployments.

## SKILLS

### Frontend

HTML, CSS, JavaScript, Bootstrap, Angular

### Middleware

ASP.NET, Web Forms, .NET Core Web API, ADO.NET, WinForms

### Databases

Oracle SQL Developer, MS SQL Server, MySQL, AWS DynamoDB

### Version Control

Git, GitHub, GitLab

### Linux

Bash Scripting, File permissions, File System Hierarchy, User Management, Ports & Protocols, Process & Log Management, Networking, Stress testing

### Cloud Computing (AWS)

IAM, EC2, S3, CloudFront, Route 53, ACM, Security Groups, AWS Amplify, CloudWatch, VPC, Application Load Balancer, Auto Scaling Group, API Gateway, Terraform as IaC

### Other Tools

Power BI, Postman, SonarQube, k6 testing

## EDUCATION

### Master Of Computer Application (MCA)

Dr. D.Y. Patil Vidyapeeth  
YOP – Pursuing | Percentage – Pursuing

### Bachelor of Engineering (BE)

Mumbai University M.U.  
YOP – 2020 | Percentage – 70%

### Diploma

Maharashtra State Board of Technical Education M.S.B.T.E.  
YOP – 2017 | Percentage – 81.76%

### SSC

Maharashtra State Board  
YOP – 2014 | Percentage – 90.40%

---

## RELEVANT PROJECTS

**National Pension Scheme (NPS)** | Aditya Birla Sun Life Insurance

- Developed PRAN shifting module for enhancing corporate contribution for corporate net deduction charge legacy calculations, followed by the UI modular changes in Angular frontend.
- Enhanced legacy modules of Bank Receipt Reconciliation and General Ledger for accounting and data traceability.

**Unusual Event (KRAMAN)** | Kotak Mahindra Bank Ltd

- Worked in legacy module of fraud case reporting module for wrongful transactions followed with multi-stage approval matrix for cases to be handled at back-office for final approval.
- Enhanced the legacy stored procedures for approval stage and case details.
- Resolved the App-Sec validation points post UAT for final patch preparation.

**Mukhyamantri Yuva Karya Prashikshan Yojana** | Skill India, State Government

<https://www.cmykpy.mahaswayam.gov.in>

- Worked in the intern joining module and candidate registration work flow and profile building stage.
- Developed a 10-stage multi-desk approval flow for attendance tracking and confirmation required for final stipend credit process.
- Contributed in the website landing page from Figma as per the client requirement and co-developed multi-user login flows with external API services.

**Secure & Scalable Multi-Tier Cloud Architecture with IaC & CI/CD** | Self

- Created and deployed a 2-tier .Net Web API and Angular applications into highly available multi-AZ secured cloud architecture with load balancing and auto-scaling services.
- Automated infrastructure provisioning using Terraform as IaC with git version control modules for quicker roll-backs in case of failure in deployments.
- Demonstrated and validated horizontal scalability by conducting rigorous load testing with K6 service and leveraging Cloud Watch metrics to monitor system performance under sudden heavy traffic spikes.
- Enforced network security by configuring Security Groups and Network ACL to ensure isolated IP based communication between frontend, middleware and database services.
- Optimized frontend delivery by deploying Angular application via Amazon CloudFront, reducing latency through global edge caching and enhancing client-side security.
